SUBJECT INDEX

Abscess, bacterial, 141, 143
Acepromazine, 16
Acidosis
  metabolic, 57, 64
  respiratory, 229
Airway anatomy, 208
Alkalosis, respiratory, 229
Alpha-2 agonists. *See also* Medetomidine; Xylazine
  for anesthesia, 10-14
  antagonism of, 13
  sedation protocol, 16
Alpha-2 antagonists, 13
Alveolar gas equation, 228
Analog-to-digital conversion, 65
Anesthesia
  α-2 agonists for, 10-14
  balanced techniques, 27-36
  for bronchoscopy, 208
  for laparoscopy, 52-54
  for laser surgery, 50-52
  prolonged recovery from, 56-64
  propofol for, 1-5
  for rabbits, 45-48
  of sighthounds, 38-42
  for thoracoscopy, 52-55
Anesthetic agents. *See also specific anesthetic agents*
  overdosage, 56
Angiography, CT, 108-109
Anticholinergic agents, with α-2 agonists, 10
Arachnoid cysts, 128-129
Arterial blood gas
  analysis, 227
  interpretation, 229-230
  oxygenation and, 227-228
  respiratory acidosis and, 229
  respiratory alkalosis and, 229
  sampling, 227
  ventilation and, 228-229
Atelectasis, pulmonary
  computed tomography of, 202-203
  ultrasonography of, 192-193
Atipamezole, 13
Atropine, 45

BAL. *See* Bronchoalveolar lavage
Balanced anesthetic techniques, 27-36
Barometric whole-body plethysmography (BWBP), 238
Benzodiazepines, 16
Biopsy
  bronchoscopy-guided, 221
  endobronchial, 211
  open-chest lung, 221-222
Brain
  activation, 108
  cerebrovascular malformations, 133
  development, disorders of, 125-129
  hemorrhage, intraparenchymal, 129-133
  infarction, 133-135
  infectious/inflammatory diseases of, 138-145
  perfusion imaging, 94, 101-102, 108
  traumatic injuries, 135-138
  tumors, 112-122
Bronchoalveolar lavage (BAL)
  collection technique, 221
  normal values, 225
  procedure, 209-211
Bronchoscopy
  anesthesia for, 208
  complications, 208-209
  contraindications, 209
  evaluation for, 208
  indications, 207, 208
  instrumentation, 207-208
  positioning for, 208
  special applications, 209-211
Brushing, bronchial, 211, 221
Butorphanol, 17, 45
BWBP (barometric whole-body plethysmography), 238

Capnography, 230
Cardiac catheterization, for pulmonary hypertension, 234-235
Cardiovascular system
  dysfunction, prolonged anesthetic recovery and, 56
  evaluation, in pulmonary hypertension, 233-234
  preexisting disease, propofol effects on, 6
  propofol effects on, 5-6
Cats
  balanced anesthetic techniques, 27-36
  intracranial neoplasia, 112-122
  respiratory parameters, normal values for, 238
  sedation/chemical restraint, 15-26
Central nervous system
  compromise, prolonged anesthetic recovery and, 59
  depression, prolonged anesthetic recovery and, 57
  postoperative alterations, 61
  preexisting disease, propofol effects on, 6
Cerebellar hypoplasia, 127-128
Cerebritis, bacterial, 141, 143
Cerebrovascular malformations, 133
Chemical restraint agents, 17
Chiari malformations, 126-127
Choroid plexus papillomas, 113
Coenurosis, 144-145
Compliance, lung, 238-240
Computed tomography (CT). *See also specific imaging concepts*
  angiography, 108-109
  brain infarction, 133-134
  concepts, 65-109
  contrast enhancement, 83, 86-87, 90
  degenerative spinal disease, 151-152
  elbow, 177-182
  eye/orbit, 160-161
  functional, 108-109
  head disorders, 170-175
  imaging strategy for spine, 148-149
  infectious spinal disease, 154-155
  interventional techniques, 109
  intracranial hemorrhage, 129-130
  intracranial tumor features, 115-122
  lung, 198-205
  spinal anatomy, normal, 149-150
  spinal neoplasia, 155-157
  technical recommendations, 112-113

three-dimensional, 109
vs. magnetic resonance imaging, 113-115
Contrast enhancement
computed tomography, 83, 86-87, 90
intracranial tumors, 120-121
Contusion, 137-138
Cranium imaging, 171-172
CT. *See* Computed tomography
Cuterebra, 143-144
Cytology
brush sampling technique, 211, 221
interpretation of, 222-225
respiratory sampling techniques, 220-222

Dandy-Walker malformations, 127
Diaphragmatic hernia, 219
Diazepam, 16
Diffuse axonal injury, 138
Diffuse infiltrative disease of lung
computed tomography of, 203-205
ultrasonography of, 193-194
Diffusion imaging, 108
Digital processing, 65, 67
Distemper encephalitis, 139-140
Dogs
balanced anesthetic techniques, 27-36
intracranial neoplasia, 1112-122
respiratory parameters, normal values for, 238
sedation/chemical restraint for, 15-26
sighthounds, anesthesia of, 38-42
Double echo technique, 79
Dystrophic mineralization of lung, scintigraphy of, 197-198

Echo time (TE), 77
Elbow
computed tomography, 177-182
magnetic resonance imaging, 182-185
Encephalitis, 139-141
End-tidal carbon dioxide analysis, 230
Eosinophilic inflammation, 222-223
Epidural hematoma, 135-136
Epidural opioids, in balanced anesthetic technique, 31-34
Eye
ballistic penetration of, 168
carcinoma of, 168
computed tomography, 160-161
magnetic resonance imaging, 161-165

Failure to breathe, postoperative, 61
Faraday's law of induction, 75
Fast imaging, 90
Fat saturation, 83
Feline infectious peritonitis (FIP), 140
Field of view (FOV), 66
FIP (feline infectious peritonitis), 140
Flexible bronchoscope, 207-208
Fluid attenuated inversion recovery (FLAIR), 79, 83
FOV (field of view), 66
Functional computed tomography, 108-109
Fungal infections, of brain, 140

Glycopyrrolate, 25, 45
Gradient echo pulse sequences, 80-81
Granulomatous meningoencephalomyelitis, 141
Gray scales
CT, 72, 74
MRI, 74
Gyromagnetic ratio constant, 75

Halothane, 17
Head trauma, 135-138
Hemorrhage
infarction from, 134
intracranial, 129-133
subarachnoid, 137
High-resolution computed tomography (HRCT), of lung, 198-205
Hilar lymph node enlargement, 218
Hippocampal injury, after seizure, 134-135
HRCT (high-resolution computed tomography), of lung, 198-205
Hydrocephalus, 125-126
Hypercarbia, 64
Hypoglycemia, 57, 63
Hypotension, 58, 62
Hypothermia, 58-59, 63
Hypothyroidism, 57
Hypoventilation, 58
Hypoxemia, 62

Imaging methods. *See specific imaging methods*
Imaging planes, 66
Infarction, brain, 133-135
Inhalant anesthetics
in balanced anesthetic technique, 28-36
prolonged elimination of, 59
sedation protocols, 15, 17
Injectable anesthetics, prolonged elimination of, 59-60
Interventional procedures
computed tomography for, 109
ultrasonography for, 194
Intracranial hemorrhage
computed tomography of, 129-130
magnetic resonance imaging of, 130-133
Intracranial neoplasia, CT/MRI diagnosis of, 112-122
Intraparenchymal hemorrhage, 129-133
Intubation, of rabbits, 46-48
Inversion recovery, 81, 83
Isoflurane, 17

Ketamine
for chemical restraint, 15, 17
in rabbit sedation protocol, 45
Kidney disease
preexisting, propofol effects on, 6
prolonged anesthetic recovery and, 57

Laparoscopy, anesthesia for, 52-54
Laser surgery, anesthesia for, 50-52
Liver
disease, prolonged anesthetic recovery and, 57
preexisting disease, propofol effects on, 6
propofol metabolism, breed-related differences in, 38
Local anesthetics, for sedation protocol, 19-24
Lung
computed tomography, 198-205
mechanics, 238-240
scintigraphy, 194-198
ultrasonography, 187-194

Magnetic resonance angiography (MRA), 90, 94
Magnetic resonance imaging (MRI). *See also specific imaging concepts*
brain infarction, 134
concepts, 65-109
degenerative spinal disease, 152-154
elbow, 182-185
eye/orbit, 161-165
head disorders, 170-175
infectious spinal disease, 155
intracranial hemorrhage, 130-133

intracranial tumor features, 115-122
spinal anatomy, normal, 150-151
spinal neoplasia, 157-158
strategy for spine, 149
technical recommendations, 112-113
vs. computed tomography, 113-115
Mandible imaging, 171-172
Masses. *See* Neoplasia
Matrix, resolution and, 66, 67
Maxilla imaging, 171-172
Medetomidine
antagonism of, 13
combination therapy, 11-13
sedation protocol, 16
selection of, 11
Meningiomas, 113, 118
Meningitis, 138-139
Metabolic acidosis, 57, 64
Midazolam
rabbit sedation protocol and, 45
risks/benefits, 16
Morphine, 17
MRA (magnetic resonance angiography), 90, 94
MRI. *See* Magnetic resonance imaging
Multiecho techniques, 90
Muscle weakness, prolonged anesthetic recovery and, 59

Nasal adenocarcinomas, 113
Nasal cavity imaging, 172-173
Nasal tumor, diagnosis of, 166-167
Nasopharynx imaging, 172-173
Necrotizing encephalitis, 140-141
Neoplasia
brain, 112-122
computed tomography of, 199-202
intrathoracic, 218
pulmonary, 192, 199-202
spinal, 155-158
ultrasonography of, 192
NEX (number of excitations), 71
Nitrous oxide, in balanced anesthetic technique, 28-29
Number of excitations (NEX), 71
Number of signals averaged (NSA), 71

Opioids
with α-2 agonists, 10
in balanced anesthetic technique, 29-36
prolonged elimination of, 59
for sedation protocols, 15, 17
Optic neuritis, diagnosis of, 167-168
Orbit imaging
clinical examples, 165-168
computed tomography, 160-161
magnetic resonance imaging, 161-165
Oxygenation, arterial blood gases and, 227-228
Oxymorphone, 17

Paranasal sinus imaging, 172-173
Parasitic infections
of brain, 143-145
cytologic interpretations, 224
Partial volume averaging artifact, 66
Pentothal, 16
Pericardial effusion, 218-219
Pituitary tumors, 113
Pleural effusion, 218

Pneumothorax
computed tomography of, 203
thoracoscopy of, 218
ultrasonography of, 193
Primary pulmonary disease, 219
Propofol
adverse reactions, 5-8
clinical uses, 1-5
liver metabolism, breed-related differences in, 38
pharmacokinetics/pharmacodynamics, 5
sedation protocol, 16
Proton density-weighted images, 78-79
Pulmonary consolidation, ultrasonography of, 189-191
Pulmonary dysfunction, prolonged anesthetic recovery and, 56
Pulmonary embolism
computed tomography of, 205
scintigraphy of, 197
Pulmonary function tests, 237-240
Pulmonary hypertension
cardiac catheterization, 234-235
cardiopulmonary evaluation, 233-234
definition of, 231
history, 232
laboratory data, 233
pathophysiology/physiology, 231-232
physical examination, 233
Pulse oximetry, 230

Rabbits, sedation/anesthesia for, 44-49
Repetition times (TR), 77
Resolution, 65-73
Resonant frequency, 75
Respiratory acidosis, 229
Respiratory alkalosis, 229
Respiratory system
cytologic interpretations, 222-225
evaluation, in pulmonary hypertension, 233-234
monitoring, 227-230
parameters, normal values for, 238
propofol effects on, 6
Retrobulbar tumor, diagnosis of, 166-167

Scintigraphy, lung, 194-198
Sedation
adjunctive therapy, 19-24
drug selection for, 15-25
equipment for, 18
preparation for, 15-18
propofol for, 1-5
of rabbits, 44-45
recovery from, 24-25, 49
Sedative-hypnotics, 15, 16
Seizures, hippocampal injury after, 134-135
Sighthounds, anesthesia of, 38-42
Signal-to-noise ratio, 66
Spatial resolution, 72
Spinal opioids, in balanced anesthetic technique, 31-34
Spin density (proton density-weighted images), 78-79
Spine
degenerative diseases, 151-154
imaging strategies, 148-149
infectious diseases, 154-155
neoplastic diseases, 155-158
normal anatomy, 149-151
vascular diseases, 158
Spin echo, 77
Spin echo pulse sequences, 75-80
Spirometry, 237

STIR images, 81, 83
Subarachnoid hemorrhage, 137
Subdural hematoma, 136-137

TBFVL (tidal breathing flow-volume loops), 237-238
T2 decay curves, 77, 79
TE (echo time), 77
Temporal resolution, 72
Thoracoscopy
  anesthesia for, 52-55
  findings, 217-219
  indications, 213-214
  instrumentation, 214-215
  patient preparation, 215
  portal access, 216-217
  portal closure/recovery, 217
  technique, 215-216
Tidal breathing flow-volume loops (TBFVL), 237-238
Tiletamine, 17
Tolazoline, 13
Tomography, 65, 66
TR (repetition times), 77
Tranquilizers, 15, 16
Transdermal opioids, in balanced anesthetic technique, 34-36
Transtracheal wash (TTW), collection technique, 220-221
T1 relaxation, 77, 80
T2 relaxation times, 75, 77, 79
T1 weighting, 77
T2 weighting, 77
Tympanic bullae, imaging of, 173-174

Uveitis, diagnosis of, 165-166

Vascular disease, spinal, 158
Vascular pain, propofol effects on, 6
Ventilation, arterial blood gases and, 228-229

Windowing, CT, 74, 75, 76

Xylazine
  antagonism of, 13
  combination therapy, 11-13
  rabbit sedation protocol and, 45
  sedation protocol, 16
  selection of, 10-11

Yohimbine, 13
